[Jonathan Fernandes](#) has been working in the field of Generative AI long before the ChatGPT hype.

He works as an AI / Machine Learning advisor to identify relevant use cases and implement them. He has led teams to create AI products across a variety of verticals.

As an AI practitioner he provides real-world examples and best-practices as part of his training. Over 250,000 have benefited from his training sessions on Machine Learning and Generative AI.

Here is a sample training on GPT-4 available on [LinkedIn](#)

These are his most requested trainings. All are adapted specific to use cases in your organisation:

- ChatGPT for everyone
- Hands-on Generative AI for [Finance | Government | Health | Retail | Law Firms | Marketing | Manufacturing]
- Fundamentals of Generative AI
- How to choose the right Large Language Model for your organisation
